Learning Management System for making institutes digital & smart

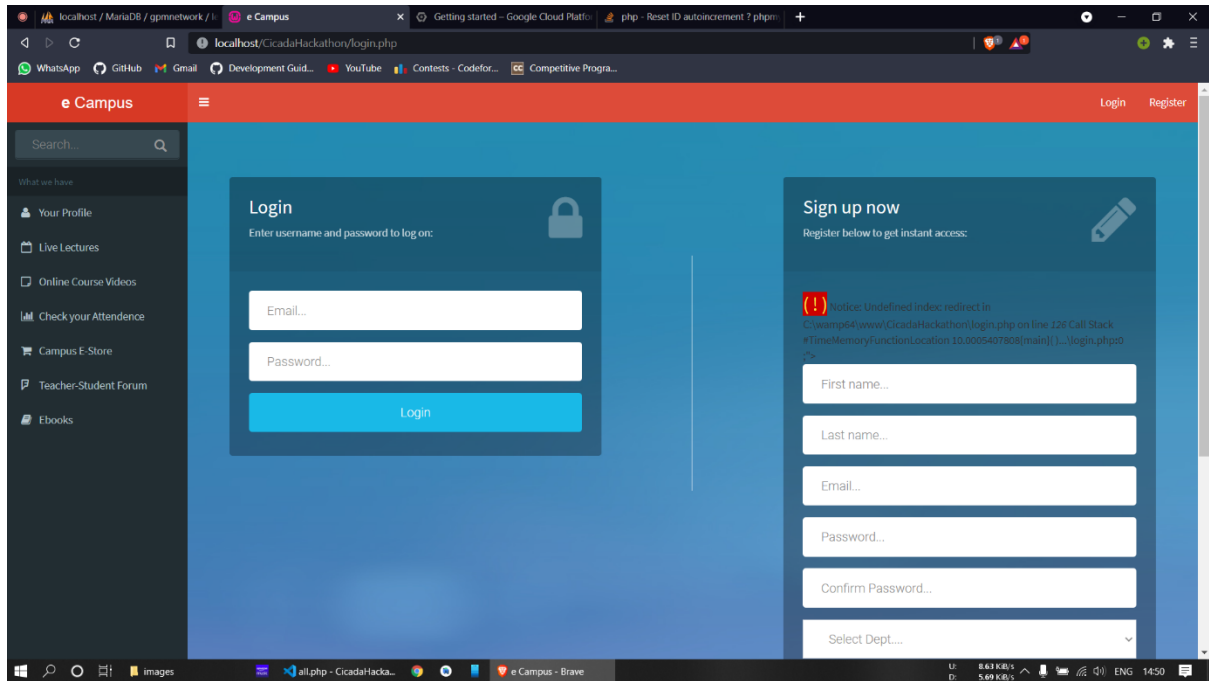

Problem Statement – Education forms the backbone of any nation. It is a powerful instrument that is responsible for the progress of any society, it is also a powerful tool to cultivate values in an individual. Therefore all the educational institutes have greater responsibility to impart learning and cultivating values through education. To have this impactful change we need to have smart Educational Institutes. Our Nation is currently going through a “Digital Revolution” and this revolution must be brought in the institutions. Today many of our Educational Institutes face the problems such as inadequate resources to get the quality education, less eco-friendly, improper library facilities, lack of distance education for the remote areas, lack of education for students with special needs and poor counseling for students to handle academic pressure.

Solution - To overcome the above obstacles that hinders in the way of our institutions to adapt to this era of digitization, we have implemented some economical and feasible solutions that will help to provide equal education and more opportunities to upcoming youth. They are as follows:

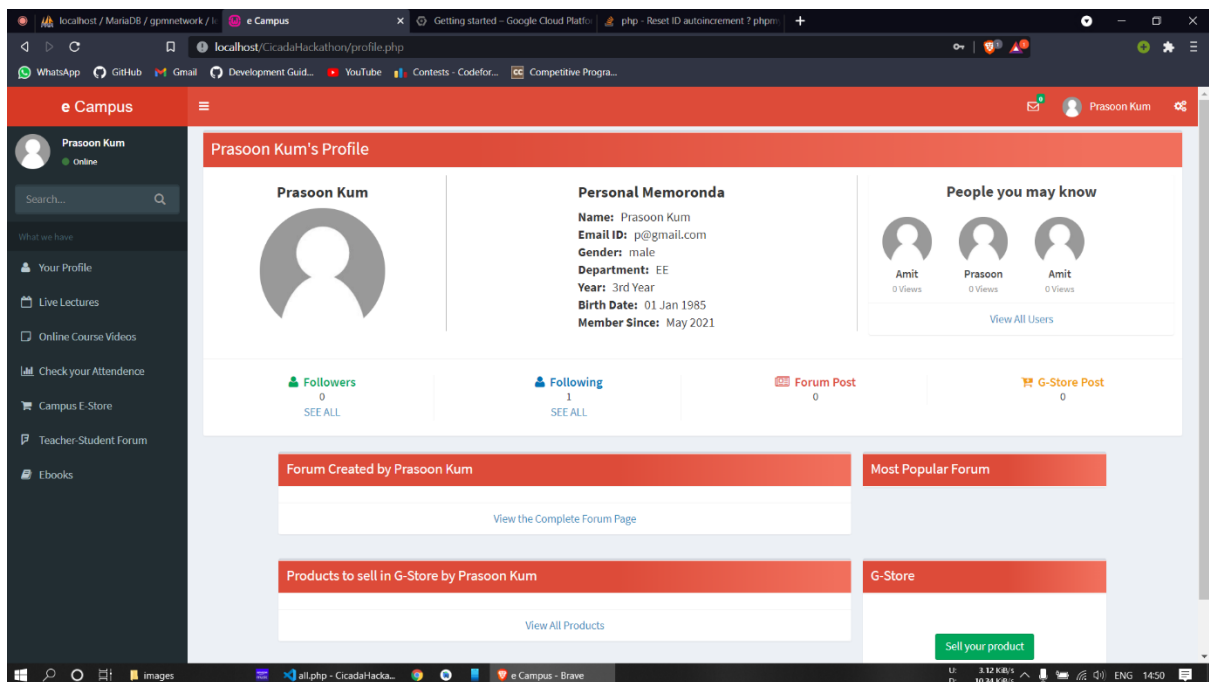

- Live streaming lecture service for distance learning.
- Complete video courses on variety of subjects.
- Cycle services for a bigger campus with a tracking system.
- Online assignment and test system for the ease of students and also for environment conversation.
- Online Counselling for students to overcome depression due to academic stress.
- Portal to bring students and teachers with similar field of interest on a single platform using online project section.
- Academic Centralization web portal for connecting student to help each other and student-teacher portal for 24x7 doubt solving and research work
- Online Stationary system portal to avoid irregularity in prices of stationery at institute level

Online Videos –

The screenshot shows the e Campus interface. The top navigation bar is red with the e Campus logo and a user profile for Prasoon Kum. The left sidebar contains links to various features like Your Profile, Live Lectures, Online Course Videos, Check your Attendance, Campus E-Store, Teacher-Student Forum, and Ebooks. The main content area is titled "Online Video Lecture" and displays a video player. Below the video player, there are three error messages and their corresponding call stacks.
